Optimizing Movie Website Development: A Functional Approach in Python

Introduction

Exploring **functional** approach in Python for **movie website** development.

Python Basics

Understanding the **syntax** and **data structures** in Python for web development.

Functional Programming

Applying **functional programming** concepts to streamline movie website development.

Database
Integration

Integrating **database** for efficient storage
and retrieval of movie information.

User Interface Design

Creating an engaging and **responsive** user interface for the movie website.

Conclusion

Harnessing the power of **Python** and **functional programming** for optimized movie website development.
